PSA Report

The 2009/10 financial year has seen the PSA committee operating as normal and dealing with a number of significant challenges.

The past year has seen the PSA improve on the level of security around the clubrooms, with one of the actions the installation of screens on windows and the upgraded screens around the bar area. There has been some additions and changes to the club rooms in the form of some additional lighting, along with the painting of the Change Rooms and the Downstairs area. We have been required to replace the Glass Washer and Upright Fridge behind the bar along with a Deep Fryer in the kitchen area.

Also the end of Oval Lighting project has been reached, with the final installments from the Council paid to the PSA. This is not the end of the PSA's commitment with the lights, as there are significant maintenance requirement for the up keep of the lights (currently under discussion with appropriate parties).

As stated last year the oval lighting has been a long drawn out process and with out the efforts of Wayne Cheney and his family the final outcome of the lights would not be any where near the standard that has been achieved. Thank you Wayne.

All this has been achieved and the PSA is still able to return a dividend to the Cricket and Football Clubs.

The PSA is also working with the Norwood, Payneham & St Peters Council on a number of issues relating to their preferred direction in relation to Operations at the Payneham Oval and the value that the facility is to the Community.

Again thank you to the Committee members that stood this year, most of these also hold positions within their respective clubs and the work load in performing both are quiet significant.

Finally I repeat from last year, the worth of the PSA is not readily understood by the general members of the Cricket and Football clubs and over the past 12 months we have been attempting to expand on the value that the PSA presents to the respective clubs.
